CONTENTS, VOLUME 92

NUMBER 1 **JANUARY 1964**

Some Attempts to Simulate the Development of Tropical Cyclones by Numerical Methods — Stanley L. Rosenthal — 1–21
Wexler Commemorative Issue Available — 21
Correspondence
Comments on Picture of the Month, March 1963 — C. J. van der Ham — 22
Semi-Objective Forecasting of Atmospheric Stagnation in the Western United States — Marvin E. Miller — 23–32
New Weather Bureau Publications — 32
Recent Articles in Other Weather Bureau Periodicals — 32
Weather Note
Remarkable Temperature Fluctuation at Keene, N.H., During Night of March 30–31, 1963 — R. E. Lautzenheiser and Richard Fay — 33–34
Picture of the Month — 35
Publications by Weather Bureau Authors — 36
The Weather and Circulation of October 1963—Abnormal Warmth and Severe Drought in the United States and Two Unusual Hurricanes Offshore — Raymond A. Green — 37–42
Revision of Monthly Temperature Charts — 42

NUMBER 2 **FEBRUARY 1964**

Aspects of Hurricane Structure: New Model Considerations Suggested by TIROS and Project Mercury Observations — Robert W. Fett — 43–60
Correction Notice — 60
Dry Days on the Island of Oahu, Hawaii — Richard K. Siler — 61–75
Picture of the Month — 76
Preliminary Results of a Hail-Reporting Project — Staff RADU, Kansas City — 77–78
The Solar Semidiurnal Pressure Wave over North America — L. Avery and B. Haurwitz — 79–83
Weather Note
Observation of a Horizontal Cloudbow — F. A. Gifford, Jr. — 84
The Weather and Circulation of November 1963—A Warm Month with Drought-Breaking Rains in the East — Julian W. Posey — 85–89
Publications by Weather Bureau Authors — 90

NUMBER 3 **MARCH 1964**

On the Physical Basis for the Numerical Prediction of Monthly and Seasonal Temperatures in the Troposphere-Ocean-Continent System — Julian Adem — 91–103
Picture of the Month — 104
Comparison of Jet Aircraft and TIROS IV Views of Density and Organization of Clouds — Edward L. Honodel — 105–114
Climatology of Damaging Lightning in Illinois — Stanley A. Changnon, Jr. — 115–120
Hailstorms in Wisconsin — Marvin W. Burley, Raymond Pfleger, and Jen Yu Wang — 121–127
The Hurricane Season of 1963 — Gordon E. Dunn and Staff — 128–138
Recent Articles in Other Weather Bureau Periodicals — 138
The Weather and Circulation of December 1963—An Unusually Cold Month — L. P. Stark — 139–146
New Weather Bureau Publications — 146

NUMBER 4 **APRIL 1964**

The Finite Amplitude Mountain Wave Problem with Entropy as a Vertical Coordinate — T. N. Krishnamurti — 147–160
On Energy Conversion Calculations — A. Wiin-Nielsen — 161–167
New Weather Bureau Publication — 168
Sequences of Wet or Dry Days Described by a Markov Chain Probability Model — Leonard L. Weiss — 169–176
Monthly Variation of Precipitation Echo Occurrences Across the United States — Lawrence E. Truppi — 177–180
Average Annual Precipitation from Daily Amounts of 0.50 Inch or Greater — J. L. H. Paulhus and J. F. Miller — 181–186
Picture of the Month — 187
Publications by Weather Bureau Authors — 188
The Weather and Circulation of January 1964—Mild in the North But Cold in the South — James F. Andrews — 189–194
Correction — 194

NUMBER 5 **MAY 1964**

Synoptic Characterization of the Thermal Nature of the Earth's Surface — R. R. Dickson — 195–201
Picture of the Month — 202
A Note on the Magnitude of Jet-Stream Winds East of Japan As Derived From Transosonde Data — J. K. Angell — 203–206
Ice Nucleus Counts and Variations at 3.4 km. and Near Sea Level in Hawaii — Saul Price and Jack C. Pales — 207–221
Publications by Weather Bureau Authors — 222
Recent Articles in Other Weather Bureau Periodicals — 222
Albedo Measurements Over the Northeastern United States — Kirby J. Hanson and Herbert J. Viebrock — 223–234

Estimates of Mean Maximum Mixing Depths in the Contiguous United States ... George C. Holzworth 235–242
Diurnal Variation in Stratospheric Temperatures and Heights Reported by the U.S. Weather Bureau Outrigger Radiosonde ... F. G. Finger, R. B. Mason, and S. Teweles 243–250
Weather Note
Tornadoes During Hurricane Carla at Galveston ... Milton I. Rudd 251–254
The Weather and Circulation of February 1964—Another Cold Month in the South ... James F. O'Connor 255–261
Suggestions for Authors ... 262

NUMBER 6 **JUNE 1964**

A Synthesis of Interpretations of Extratropical Vortex Patterns As Seen by TIROS ... William K. Widger, Jr. 263–282
Satellite Photographs of Convective Clouds and Their Relation to the Vertical Wind Shear ... Carl O. Erickson 283–296
The Meteorological Aspects of Ice Cover on the Great Lakes ... T. L. Richards 297–302
Hemispheric Distribution of 5-Day Mean 700-mb. Circulation Centers ... James F. O'Connor 303–315
Picture of the Month ... 316
Heavy Precipitation Storm in Northern Utah, January 29 to February 2, 1963 ... E. Arlo Richardson, Eugene L. Peck, and Samuel D. Green 317–325
Correction ... 325
Weather Notes
Visual Observations Beneath a Developing Tornado ... Ralph J. Donaldson, Jr. and William E. Lamkin 326–328
Unusual Tornado Photographs ... Walter H. Hoecker, Jr. 328–329
A Note on the Temperature Trend, 1815–1963, as Revealed by the Closing Dates of Navigation on Lake Champlain ... Richard J. Stone and James K. McGuire 330–332
The Weather and Circulation of March 1964—Floods Followed by Extreme Cold ... Julian W. Posey 333–338

NUMBER 7 **JULY 1964**

Relationship Among Tornadoes, Vorticity Acceleration, and Air Mass Stability ... Donald S. Foster 339–343
Picture of the Month ... 344
Cloudburst at Tulsa, Oklahoma, July 27, 1963 ... Staff, RFC, Tulsa, and DMO, Kansas City 345–351
Weather Notes
Rare Halo Phenomenon ... H. E. Landsberg 352
Hurricane Ginny's "Tail" ... Richard Fay 353–354
Correction Notice ... 354
Correspondence
Geographical Differences in Concentrations of Ice Nuclei ... E. K. Bigg 355–356
The Weather and Circulation of April 1964—A Stormy Month in the Midwest ... L. P. Stark 357–362

NUMBER 8 **AUGUST 1964**

Some Preliminary Dust Devil Measurements ... Peter C. Sinclair 363–367
Picture of the Month ... 368
Dew in the Mississippi Delta in the Fall ... O. H. Newton and J. A. Riley 369–373
The Weather and Circulation of May 1964—Large Weekly Variations ... Raymond A. Green 374–380
Weather Note
Large Hail in Central Montana, June 28, 1963 ... R. A. Dightman 380–382

NUMBER 9 **SEPTEMBER 1964**

The Use of Decision Theory in Meteorology ... Harry R. Glahn 383–388
A Study of the Filling of Hurricane Donna (1960) Over Land ... Banner I. Miller 389–406
Picture of the Month ... 407
New Weather Bureau Publications ... 408
Some Problems Involved in the Numerical Solution of Tidal Hydraulics Equations ... D. Lee Harris and Chester P. Jelesnianski 409–422
Short- and Long-Period Gravity Waves Over Northeastern United States ... N. K. Balachandran and William L. Donn 423–426
Correspondence
Comments on Interactions of Circulation and Weather Between Hemispheres ... Adalberto Serra 427
Reply ... J. Namias 427
The Weather and Circulation of June 1964—Reversal of a Long-Standing Trend Over the Pacific ... R. R. Dickson 428–432
Publications by Weather Bureau Authors ... 433–434

NUMBER 10 **OCTOBER 1964**

A Study of Martian Yellow Clouds that Display Movement ... F. A. Gifford, Jr. 435–440
Some Examples of the Detection of Jet Streams from TIROS Photographs ... V. J. Oliver, R. K. Anderson, and E. W. Ferguson 441–448
A 5-Year Experiment in the Preparation of Seasonal Outlooks ... J. Namias 449–464
Use of Tetroons to Investigate the Kinematics and Dynamics of the Planetary Boundary Layer ... James K. Angell 465–470
Comparison of Long-Term Changes in Air and Soil Temperatures at Urbana, Illinois ... Stanley A. Changnon, Jr. 471–473
Picture of the Month ... 474
Weather Notes
Contoured Radar Display of a Line of Thunderstorms ... Neil B. Ward 475
Ground Damage by Tornado ... C. R. Gray 476

The Weather and Circulation of July 1964—A Warm Month Associated with Retrogression ..... James F. Andrews 477–482

NUMBER 11 NOVEMBER 1964

On Estimates of the Atmospheric Energy Cycle ..... Abraham H. Oort 483–493
Picture of the Month 494
Global Cloud Cover for Seasons Using TIROS Nephanalyses ..... Philip F. Clapp 495–507
Formula for Approximation of the Ratio of the Saturation Vapor Pressure Over Ice to That Over Water at the Same Temperature ..... Julius F. Bosen 508
A Comparison of Scatter-Diagram Analysis with Discriminant Analysis and a Note on Maximizing the Skill Score ..... Harry R. Glahan and Roger A. Allen 509–512
A Cold Front Invasion of Southern Venezuela ..... Vance A. Myers 513–521
Publications by Weather Bureau Authors 522, 542
Structure of a Cold Front Near the Center of an Extratropical Depression ..... Werner Schwerdtfeger and Norton D. Strommen 523–531
Addendum to "A Study of Martian Yellow Clouds That Display Movement" ..... F. A. Gifford, Jr. 532
Correction Notice 532
Weather Note
Train Derailments by Tornadoes ..... William E. Hardy 533–534
The Weather and Circulation of August 1964—An Unusually Cool Month ..... Julian W. Posey 535–542

NUMBER 12 DECEMBER 1964

Study of a Continental Surface Albedo on the Basis of Flight Measurements and Structure of the Earth's Cover over North America ..... Ernest C. Kung, Reid A. Bryson, and Donald H. Lenschow 543–564
Computer Analysis and Forecasting in the Tropics ..... Harold A. Bedient and Joseph Vederman 565–577
Picture of the Month 578
Comparison of Analytical and Numerical Solutions to an Initial Value Problem Defined by a Linearized, Quasi-Geostrophic Model ..... Stanley L. Rosenthal 579–587
Technical Note
Notice of Change in Synoptic Code Effective January 1, 1965 588
The Problem of Detecting Meso-Scale Motion Systems ..... D. C. House 589–592
Weather Note
Aerial Photographs of a Tornado Path in Nebraska, May 5, 1964 ..... Norman E. Prosser 593–598
Correspondence
Comments on "A Synthesis of Interpretations of Extratropical Vortex Patterns As Seen by TIROS" ..... L. F. Hubert 598–599
Reply ..... William K. Widger, Jr. 599–600
The Weather and Circulation of September 1964—Abnormal Tropical Storminess ..... Raymond A. Green 601–606
Contents, Volume 92 607–609
Correction Notices 609
Index, Volume 92 610–614

CORRECTION NOTICES

Vol. 91, Nos. 10–12:

p. 637: The sentences beginning at bottom of column 1 should read: "In all figures the Q curve is a plot of increments of pressure corrected optical depth, in centimeters of precipitable water vapor, between successive pressure intervals. This plotted curve utilizes the numerical values of the radiation scale. It is interesting to see the optical depth increments decrease through the cloud, from 570 through 490 mb. in this example."

pp. 637–639: In captions to figures 2–6 "mixing ratio Q" should be changed to "optical depth Q."

Vol. 92:

No. 3, p. 146: Reference 4 should be J. F. O'Connor "The Weather and Circulation of January 1963—One of the Most Severe Months on Record in the United States and Europe," *Monthly Weather Review*, vol. 91, No. 4, Apr. 1963, pp. 209–217.

No. 5, p. 211, col. 1: Last sentence before section 4 should read "Hilo's *second* highest morning count, 488," etc.

p. 212, table 4: Caption should read "Median number of ice crystals *and of dust particles*" etc. A second row should be added to the table as follows:

	a.m.	p.m	a.m.	p.m.
Dust particles	400	280	218	238

p. 217, last sentence in last complete paragraph in col. 2 should read: "On both occasions, the possibility that nuclei from higher aloft may have been involved in the increase at MLO, which preceded by a day that at Hilo, is somewhat discounted by the fact that counts at the Observatory were less than a tenth those at Hilo."

No. 5, pp. 251 and 252: In the legends to figures 1 and 2, the date should be September 12, 1961.

No. 8, p. 380: The time of the fall of hailstones in central Montana should be 1900 MST (7 p.m.) not 0700 MST.

INDEX, VOLUME 92

PRICE, SAUL:
and Jack C. Pales. Ice nucleus counts and variations at 3.4 km. and near sea level in Hawaii. 207–221.

Probability, Markov chain model applied to precipitation occurrence. 169.

PROSSER, NORMAN E.:
Aerial photographs of a tornado path in Nebraska, May 5, 1964. 593–598.

Publications:
by Weather Bureau authors. 36, 90, 188, 222, 433, 522.
new Weather Bureau. 32, 146, 168, 408.

R

Radar precipitation echoes, variation in occurrences across U.S. 177.
Radar, scope presentation to show levels of storm intensity. 475.
Radiation, solar:
albedo measured, northeastern U.S. 223.
albedo of various surface covers, North America. 543.
Radiosonde, outrigger, USWB type. 243.
Recent articles in other Weather Bureau periodicals. 32, 138, 222.
Richards, T. L.:
The meteorological aspects of ice cover on the Great Lakes. 297–302.
Richardson, E. Arlo:
and Eugene L. Peck and Samuel D. Green. Heavy precipitation storm in northern Utah, January 29 to February 2, 1963. 317–325.
Riley, J. A.:
and O. H. Newton. Dew in the Mississippi Delta in the fall. 369–373.
Rosenthal, Stanley L.:
Comparison of analytical and numerical solutions to an initial value problem defined by a linearized, quasi-geostrophic model. 579–587.
Some attempts to simulate the development of tropical cyclones by numerical methods. 1–21.
Rudd, Milton I.:
Tornadoes during hurricane Carla at Galveston. 251–254.

S

Satellite meteorology:
convective clouds, and relation to wind shear. 283.
detection of jet streams. 441.
extratropical vortex patterns. 263, 598.
global seasonal cloud cover from TIROS nephanalyses. 495.
hurricane structure suggested. 43.
picture of the month. 22, 35, 76, 104, 187, 202, 316, 344, 368, 407, 474, 494, 578.
Satellite observations, compared with aircraft observations. 105.
Schwerdtfeger, Werner:
and Norton D. Strommen. Structure of a cold front near the center of an extratropical depression. 523–531.
Serra, Adalberto:
Comments on interactions of circulation and weather between hemispheres. 427. [Reply, J. Namias. 427]
Siler, Richard K.:
Dry days on the island of Oahu, Hawaii. 61–75.
Sinclair, Peter C.:
Some preliminary dust devil measurements. 363–367.
Skill score, maximizing. 509.
Soil temperature, long-term changes, Urbana, Ill. 471.
Solar semidiurnal pressure wave over North America. 79.
Southern Hemisphere meteorology, cold front in Venezuela. 513.
Spacing of observations, to detect meso-scale systems. 589.
Stability, air mass, role in tornado development. 339.
Staff, radu unit, Kansas City, Mo.:
Preliminary results of a hail reporting project. 77–78.
Staff, rfc, Tulsa and dmo, Kansas City:
Cloudburst at Tulsa, Oklahoma, July 27, 1963. 345–351.
Stark, L. P.:
The weather and circulation of December 1963—An unusually cold month. 139–146.
The weather and circulation of April 1964—A stormy month in the Midwest. 357–362.
Stone, Richard J.:
and James K. McGuire. A note on the temperature trend, 1815–1963, as revealed by the closing dates of navigation on Lake Champlain. 330–332.
Strommen, Norman D.:
and Werner Schwerdtfeger. Structure of a cold front near the center of an extratropical depression. 523–531.
Synoptic code, change from °F. to °C. 588.

T

Temperature:
change from °F. to °C. in synoptic code. 588.
long-term changes Urbana, Ill. 471.
monthly and seasonal, physical basis for prediction. 91.
sharp fluctuations, Keene, N.H. 33.
stratospheric, reported by USWB outrigger radiosonde. 243.
trend, 1815–1963, upper New York. 330.
Tetroons, to investigate parameters within planetary boundary layer. 465.
Teweles, S.:
and F. G. Finger and R. B. Mason. Diurnal variation in stratospheric temperatures and heights reported by the U.S. Weather Bureau outrigger radiosonde. 243–250.
Thermal abnormality of earth's surface, effect on future weather. 195.
Thunderstorms, intensity shown by contoured radar return. 475.
Tidal hydraulics, numerical solutions of equations. 409.
Tornadoes:
damage to sod and soil. 476.
during hurricane Carla, Galveston. 251.
observations beneath a developing. 326.
photographs, from beneath developing storm. 328.
photos of path, Nebraska, May 5, 1964. 593.
relation to vorticity acceleration and air mass stability. 339.
train derailments by. 533.
tropical cyclones, development simulated numerically. 1.
tropical meteorology:
cold front invasion, Venezuela. 513.
computer analysis and forecasting. 565.
Truppi, Lawrence E.:
Monthly variation of precipitation echo occurrences across the U.S. 177–180.
Typhoons, September 1964. 601.

U

Utah, heavy precipitation, Jan. 29–Feb. 2, 1963. 317.

V

van der Ham, C. J.:
Comments on picture of the month, March 1963. 22.
Vapor pressure, approximation formula (ice-water) for computer program. 508.
Vederman, Joseph:
and Harold A. Bedient. Computer analysis and forecasting in the Tropics. 565–577.
Venezuela, cold front penetration. 513.
Viebrock, Herbert J.:
and Kirby J. Hanson. Albedo measurements over the northeastern United States. 223–234.
Vortex patterns, extratropical, seen by TIROS. 263, 598.
Vortices, dust devil measurements. 363.
Vorticity acceleration, role in tornado development. 339.

W

Wang, Jen Yu:
and Marvin W. Burley and Raymond Pfleger. Hailstorms in Wisconsin. 121–127.
Ward, Neil B.:
Contoured radar display of a line of thunderstorms. 475.
Weather notes:
contoured radar display of line of thunderstorms. 475.
ground damage by tornado. 476.
hailstones, Montana, June 28, 1963. 380.
halo phenomenon. 352.

Weather notes—Continued
horizontal cloudbow. 84.
hurricane Ginny's "tail". 353.
photos of tornado path, Nebraska, May 5, 1964. 593.
temperature fluctuation, Keene, N.H., March 30–31, 1963. 33.
tornadoes during hurricane Carla, Galveston. 251.
unusual tornado photos. 328.
visual observations beneath developing tornado. 326.
Weather, U.S., and N.H. circulation:
October 1963. 37.
November 1963. 85.
December 1963. 139.
January 1964. 189.
February 1965. 255.
March 1964. 333.
April 1964. 357.
May 1964. 374.
June 1964. 428.
July 1964. 477.
Weather, U.S.—Continued
August 1964. 535.
September 1964. 601.
WEISS, LEONARD L:
Sequences of wet or dry days described by a Markov chain probability model. 169–176.
WIDGER, WILLIAM K., JR.:
A synthesis of interpretations of extatropical vortex patterns as seen by TIROS. 263–282.
Reply. [to "Comments on 'A synthesis of interpretations of extratropical vortex patterns as seen by TIROS,'" by L. F. Hubert. 598]. 599–600.
